**Portfolio Overview**

1	<b>Internet retail</b> Australia public	% of portfolio EV EV/FCF P/E	32% \$100m < 8x <10x	A growing and cash-gushing niche company that invested all the cash it generated from a good business into an unprofitable geography. The unprofitable business is being shut down with the full earnings benefit expected to shine through in late 2017. Owner-run, lots of cash and no debt. Strategic asset for other, larger industry players.
2	<b>Foods</b> Europe public	% of portfolio Market cap P/E	17% >\$1bn < 10x	A growing and vertically integrated company in an attractive sector benefiting from strong demand growth and supply restrictions. Unique assets and long-term oriented, shareholder-friendly management. Annual earnings growth has averaged 30% over the last 5 years.
3	<b>Advertising</b> China (HK) public	% of portfolio EV EBITDA Capex	16% \$600m \$120m \$ 50m	A reliable compounder with unusually good corporate governance (for China) given its controlling (and distressed) American shareholder. Over the last 10 years, the company has been growing earnings at 10% p.a. despite high cash dividends (no full reinvestment of capital). The company is sitting on >\$250m of hidden cash in the form of upfront payments/capex for future cash flows. Ideal target for any LBO fund.
4	<b>Coal</b> USA public	% of portfolio Market cap FCF Dividend yield	12% \$2,600m \$ 450m >12%	One of the largest and lowest-cost coal miners in the U.S. Reserve life >50 years, underleveraged, run by a self-made billionaire who keeps re-investing the cash dividends (dividend yield >12%). Undergoing a restructuring to simplify the corporate structure, facilitating buybacks, and increase float.
5	<b>Legal services</b> Australia public	% of portfolio Market cap P/E P/BV	8% \$80m 5x 50%	A solid company that recently booked material impairments after an aggressive acquisition spree came to an end. Trading at very low multiples on a going concern basis and well below book (after impairments).
